4.SIGNAL ON/OFF [d]

**T : PRESET TIME T : PERIOD < T   P : POWERS : SIGNAL R : RELAY**
5.SIGNAL OFF DELAY [E]

6.INTERVAL [F]

7.SIGNAL OFF/ON [G]

8. ONE SHOT OUTPUT [H]

T : PRESET TIME T : PERIOD < T   P : POWERS : SIGNAL R : RELAY
FUNCTIONAL DESCRIPTION:

1.ON DELAY [A]

The Timer starts when both power (p) and signal (s) are applied .The relay is energized at the end of preset Timer (T) and remains on till power is removed.

2.CYCLIC OFF/ ON {OFF START (Sym,Asym)} [b]

T-ON and T-OFF can be same or different .The relay keeps on changing its status till the power is removed.

3.CYCLIC ON/OFF {ON START (Sym, Asym)} [C]

This function is quite similar to the function "b" but Initially the relay is ON for period T-ON after the power is applied.

4.SIGNAL ON/OFF [d]

The output relay is turned ON for preset Time (T) When ever the signal (S)is applied or removed .(Refer Note :2)

5.SIGNAL OFF DELAY [E]

Output relay become on when signal (S) is applied. The Timer duration (S) is removed. At the end of timer Duration (T) the output relay goes OFF. Signal (S), if applied during the timer duration (S) will re -trigger The timer and the total duration will be extended.

6.INTERVAL [F]

When Signal (S) is applied ,the Timer Starts and the output relay is energized .The output relay becomes OFF at the end of timer duration (T).

7.SIGNAL OFF/ON [G]

When Signal (s) is applied or removed, the relay changes .Its state after timer duration (T) (Refer Nots : 2)

8.ONE SHOT OUTPUT [H]

When Signal (s) is applied ,the timer duration (T) Starts. At the end of Timer duration (T), the relay gets energized for approximately 1 sec.(Refer Note:2)

1.For power -on operation the terminal B1 and A1 must be present.

2.In case of all modes except mode G a change in Signal (s) status during the Timing Duration (T),does not affect output status but resets timing and re-triggers timing.

3.Output de-energises when device enters PROGRAM MODE and starts new cycle after coming out of. PROGRAM MODE.

4.Loads which have current requirement 1mA,can only be used as Optional Load . For e.g Contactor coil ,AC Relay Coil, etc,
