

EBCHQ

High Precision Probe Digital Thermometer

This unit is a high precision electronic probe thermometer, capable of measuring the value of Celsius degree/Fahrenheit degree and holding the test datum, used for reference in industry, laboratory, food temperature test and monitor, as well as cooking (such as to check out the temperature of boiled food, infant milk and so on).

58103

- **Overrange indication:** The unit will display "E00" when the measured temperature exceeds the rated range.
- **Data Hold Function**
- **Auto power off:** After being idle for about 15 minutes

SPECIFICATION

Temperature range: -40 to 250°C / -72 to 482°F,
Accuracy: ±1°C (0~80°C) / ±2°C (Other)

Power: 1.5V (LR44/AG13)

Dimensions (W×L×T): 20×150×16 mm

Weight: 23g (with battery)

Accessories: Users Manual
